Number 25 for "The Philatelic Bookshop"

This catalogue with number 25 gives a strange, positive impression!

Twenty-five catalogues of philatelic literature, the first one published in November 1989. In June, we had just formed Edizioni Vaccari s.a.s. with which we officially started our editorial activity, next to our father's commercial one relevant to philately and postal history (he had already started publishing philatelic literature works).

In the present edition, five new books published by our publishing house in 2007. Among classical works, a volume (in Italian, German and English) about the *Lombardy-Venetia Kingdom collection of Emil Capellaro* by Paolo Vaccari, a real "gem" as it shows, in colour, one of the most important collections in the world. Among catalogues, the biennial *Vaccari 2008-2009* specialised in postage stamps and postal history, at its XIII edition: catalogue and quotation of Italian Ancient States, Provisional Governments, Kingdom of Italy, from 1850 to 1900, with historical background and postal history notes. It is also sold by the Italian Post. Under way the study by Mario Mentaschi and Thomas Mathà, *Letter Mail from and to the Old Italian States 1850-1870*, first volume to be published in Italy about international routes and rates relevant to mail from and to the Old Italian States; given the importance of the work the authors have written it in English.

Then, two books to fix a new appointment, MEETING HISTORY: the new edition of the study by Fabio Bonacina *La salma nascosta* ("The hidden corpse") which deals with last "journey" by Benito Mussolini after Piazzale Loreto, from Cerro Maggiore to Predappio (29/30 August 1957) and, on the occasion of the birth bicentenary of Giuseppe Garibaldi, the "hero of the two worlds", a work written by his son, Ricciotti Garibaldi, about the battle in Drisko *La camicia rossa nella guerra balcanica in Epiro 1912* ("The redshirts in the Balkan war - Campaign in Epirus 1912"), which is accompanied by a rich section of documents.

The internet site www.vaccari.it gives us great satisfaction, above all because it has become the main consultation and reference instrument for many clients and readers, and this was our aim. There were a few starting technical problems, immediately solved; anyway, thanks to the indications and suggestions sent us by some users, we could redefine our objectives and now the site is more handy and useful. It is not so easy to create a system which is able to adapt to any user, to the different operating systems, browsers, etc. utilized, to the many

distinct ways to do things. But the site is one and we have made it as "user friendly" as possible.

Therefore, please inform us about any problems or technical difficulties, because we would like to improve the service, created above all for users to make consultation and commercial operations easier. Since this catalogue on paper is printed once a year, any updates - mostly weekly - are made in our internet site.

If you would like to have fresh information, please send us your e-mail address, which is a really precious tool (you can use the form at the end of the catalogue). Many people already receive our informative e-mails (maximum 3 per month): updates in the site, new products, new books under way or just published, new special sales effected only through the site, ...

Concerning this, we would like to inform you that the 1x1 sale on page 81 (with 1211 titles) is regularly updated in the internet site; this gives us the possibility to offer you new items regularly.

In the site there are also the periodic sales with special discounts. So, keep an eye on the site!

In the present catalogue there are more than 60 new books, and all the new editions of yearly catalogues, for a total of 627 titles. 55 new offers in the section for free books "in omaggio" on page 108. They represent a large discount for those who buy in our "virtual shop" or "by mail".

The daily news service on-line "Vaccari news" www.vaccarinews.it, which started on tiptoe and challenged the traditional philatelic information systems, has now become a daily appointment for many readers. Next year we will celebrate its 5th birthday; we are going to prepare some surprises and we hope that you will like them.
