### CHARITY INITIATIVE

Following the positive experience of the past years, even this time, for one of the lots of the auction the net return is assigned to **CHARITY** and Vaccari srl adds a sum equal to the price realised at the auction.

### To Aseop four thousand euro

**The space lot of the auction destined to help the onlus  
has been knocked down at two thousand euro, and Vaccari srl has doubled the amount**

Four thousand euro to help Aseop, the Paediatric Oncology Haematology Support Association onlus. This is the total amount reached with lot 1119 during Vaccari auction. Six space letters with one thousand euro as a starting price but knocked down at two thousand euro; Vaccari srl has doubled the amount, as in the past three years in the other charity initiatives connected to the auctions.

“These important and genuine letters -said Paolo Vaccari, the president of the company - have a commercial value of more than three thousand euro”.

Then, after the Italian Association for Cancer Research, the association “Vip - Viviamo in positivo” (clowntherapy) and Francesca Rava Foundation (operating also in Haiti), this is the turn of Aseop, the Modenese association which takes care of ill children.

“I was glad to come -said Rinalda Busani, Aseop vice-president - also to get in touch with a world which is unknown to me. The association was born twenty-three years ago: a group of parents with their children ill needed a hospital environment isolated”, because even a simple infection can be lethal. “Now we also have a psychologist, because when a child gets ill, even his/her family gets ill”. The activities of the association cover many aspects, for example they help the families from an economic point of view (very often a mother is obliged to stop working in order to follow her child), they give accommodation to those coming from far off, they support research (still today, one child out of four cannot survive) and they also operate in foreign countries.

Adelmo Perugini, after some raises, has bought the lot.

The lot (1119) selected for this initiative is a group of 6 covers travelled in space: 4 of space station MIR, 1 of Salyut-6 and 1 of Soyuz TM-21 flight.  
Starting price = 1,000 euro.
