Valuations in Euro for unused, and for postal and fiscal use.

Exhaustive work, updated and revised (**200 pages more**), which presents all the revenue stamps of the Kingdom of Italy and the first period of the Italian Republic from 1863 to 1957, and of the Italian colonies in Africa (Libya, Eritrea, Somalia), for the first time in a catalogue. Reproductions are full size.

Every issue is accompanied by a short description of the revenues, reproduced in natural size, and by the relevant issue decrees which give important information about the reasons why they were issued and their characteristics. Postal and fiscal documents are a valuable testimony for the facts and events which took place in Italy.

The analysis of the revenues is carried out both on their postal use and their fiscal use. Valuations have been updated, expressed in Euro, and accompanied by their **rarity degree**.

The present work is the most specialized catalogue in that it records quotations for unused revenue stamps, but also for their postal and fiscal use.

New division in **seven parts**, all of them updated and increased. Each chapter deals with a specific function: fixed rate revenue stamps, for government licences and administrative acts, for bills of exchange, for luxury objects and trade, for general turnover tax, for transport of goods by motor vehicles, for Italian colonies in Africa.

IMPORTANT CHANGES WITH RESPECT TO PREVIOUS EDITIONS:

- **updates** and **additions** in the old chapters;
- addition of **new studies**, never published before, on revenue stamps for government licences and administrative acts and for Italian colonies in Africa;
- **valuation** updating for **unused, postal use, fiscal use**;
- change of **valuations in Euro**.
